Thank you for requesting details of our oven cleaning training package. The Carpet & Oven Cleaning Company are the leading independent Oven Cleaning Company in the North West, providing a professional and reliable service. Our company is highly respected within the industry and its many repeat customers are testament to our high quality service and excellent customer care.

Being an independent oven cleaning company rather than a franchise means that you can run your own business your way, without the limitations or constraints of a franchise. After all, with our guidance an oven cleaning business is not difficult to set up – so why hand over a percentage of your profits to a franchise? We will still support you once your training is completed, giving you the benefit of our extensive experience in oven cleaning and in running your own business.

Should you have any queries regarding our Training Package please do not hesitate to contact us on the telephone number above.

Yours sincerely

Ryan Balderstone

Why an oven cleaning business?

There is a growing need for this service. Oven cleaning is certainly one of the most hated domestic chores, as it is hard work, takes up too much time and the usual “supermarket” products available to the general public are unpleasant to use. Added to this the results after hours of dirty work are nowhere near as good as those achieved by a professional oven cleaning operative.

The target market for this business is enormous as virtually every home has an oven and is extremely diverse, our repeat customers span differing generations and income brackets. Furthermore, once a customer has had their oven professionally cleaned and seen how good the results are, they will not want to clean their oven themselves again - this is proved by the huge amount of repeat business we generate! In addition there is the opportunity, once confident with domestic oven cleaning to extend your business into the commercial market.

How do we do it?

To clean a typical single oven takes 1 – 2 hours. We only use non-caustic, non-toxic, fume free products in the customer’s home. The van is equipped with a ‘dip tank’, into which all removable parts are placed. This is how all those really difficult bits that customers can’t get to, are cleaned. While these parts are in the dip tank, the rest of the oven is cleaned, by hand.

Once trained and confident, it is reasonable to expect to clean 4 - 5 ovens in a day. We use the best, safest and fastest system.

Potential Earnings

A professional Oven Cleaning Operative has the potential to achieve a turnover of £70k. This is based on an average job value of £70+ over five days per week, cleaning 4 ovens each day. We currently average over £75 per job.

The Training

The training package is normally carried out over the course of a 5 day week, which gives the opportunity to gain hands on experience with different types of oven. The training is on a 'one to one' basis and in addition to the oven cleaning other aspects of training will be included, for instance how to remove an oven door for appropriate cleaning, replace the oven bulb, and professionally clean a Hob and Extractor Hood.

Time will also be allocated during our training package to show you how we carry out the admin side of the business including how we 'book in' our customers (to achieve a balanced work day) and also an example of the accounting system we use.

The course also covers the topic of 'Fitting out the Van', to carry the specialist Dip Tank, Water Storage and Rinse System. Please note if you wish to order your dip tank from us there is approximately a 4 week wait.

After completion of the training you will leave with a comprehensive training manual for your reference and details of contacts for all supplies needed.

We also include a Start Up Pack which consists of 3 months supply of cleaning materials. This comprehensive training package offers excellent value for money.

As there are only a limited number of places available each month please call without delay to discuss our training course in further detail and take the first step towards running your own business!

And remember also included in our Training Package is the benefit of our wealth of experience in providing and running a first class oven cleaning business and on-going telephone support should you need it.

Other Information

Accommodation is available locally at an approximate cost of £35.00 per night. As training is given in a 'hands on' basis, please be aware that comfortable clothes (suitable for oven cleaning!) and footwear is needed.

One Of Our Fleet

The most expensive part of setting up your own oven cleaning business is your van. The size of vehicle is up to yourself but we find the Vauxhall Combo / Renault Kangoo the most practical with regard to parking and accessibility and storage of equipment. Vehicles of this size cost less than £200 a month on Hire Purchase or Lease, a smart vehicle gives the right image. The van needs to have a side loading door.

Starting Up Costs

The Cost of the Training Package	£995.00
The cost of the Dip Tank supply only approx.	£1,600.00
The cost of the water pump and blue drum (for water rinse system) supply only	£200.00

You can source your own dip tank and water rinse system, you don't need to buy from us.

In this instance only the £995 training fee is applicable.

Other costs

Cost of a van or Hire Purchase

Sign Writing of the van

Telephone

This is a business opportunity that is suitable for anyone who is prepared to undertake a certain amount of physical work. A reasonable degree of fitness will be required. However, as this will be your own business, not a franchise, you can build up your working day as you become more used to it. To begin with, more important than your level of fitness, is your own determination to succeed in making your business successful.

Health and Safety

The various aspects of Health and Safety involved in the Oven Cleaning Business will be covered during your training, for example storage of products, compliance with environmental issues and personal safety.

Frequently Asked Questions

Q. Do you do 'Taster Days'?

A. No. We believe a 5 day course is required to teach you all you need to know about the various aspects of starting up your own oven cleaning business. Taster Days can leave you extremely confused and ill equipped to attempt to clean someone's oven.

Q. Who will be teaching me?

A. We want to ensure that you receive the correct training, leaving you confident to start up your own oven cleaning business; that is why the training is given by the owner of the business – ensuring you are given the training you have paid for!

Q. When can I book a Training Package with you?

A. Please telephone to book. As training is given on a one to one basis, availability is subject to weeks not already being pre-booked.
